ORACLE ACCOUNTING HUB CLOUD.
READY FOR TAKE OFF.

Oracle Software with PROMATIS Solutions

Award-winning Oracle accounting software combined with reliable PROMATIS Best Practice solutions, project management processes, procedure models, templates, and services.

From the pioneer of process-oriented implementation of Oracle enterprise software solutions — the Kickstart to integrate multiple systems with highly sensitive data.

Why the Accounting Hub Cloud?

To systematically merge financial data in a valid and primary ledger as a "single source of truth" with expansion potential to secure successful audits and compliance as well as to meet future requirements.

An outstanding solution for implementing enterprise-wide accounting policies with a dynamic view of business information.
.

Kickstart for process innovation!

With the Kickstart offerings for the Oracle Applications Cloud, PROMATIS enables a smart entry into the use of application software services: fast, economical, low-risk. For a fixed price!
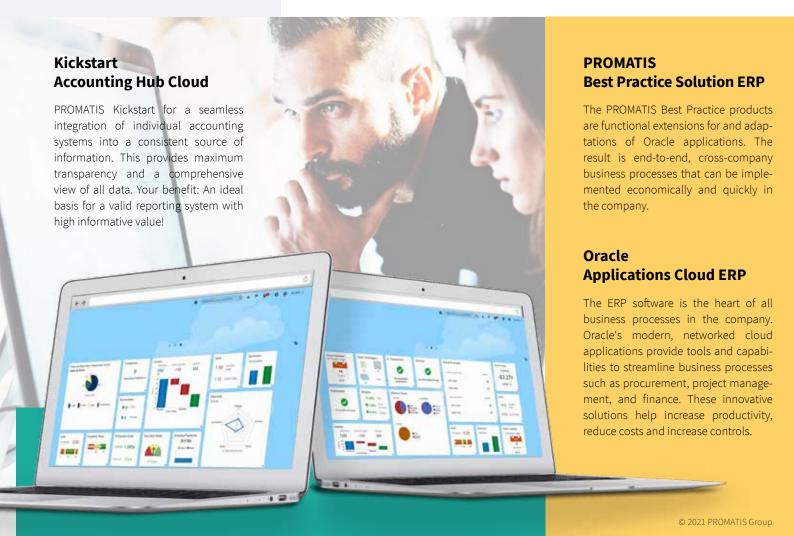

A pre-configured Oracle SaaS product suite with best practice business process models and proven PROMATIS implementation and training services.

Kickstart
Accounting Hub Cloud

PROMATIS Kickstart for a seamless integration of individual accounting systems into a consistent source of information. This provides maximum transparency and a comprehensive view of all data. Your benefit: An ideal basis for a valid reporting system with high informative value!

PROMATIS
Best Practice Solution ERP

The PROMATIS Best Practice products are functional extensions for and adaptations of Oracle applications. The result is end-to-end, cross-company business processes that can be implemented economically and quickly in the company.

Oracle
Applications Cloud ERP

The ERP software is the heart of all business processes in the company. Oracle's modern, networked cloud applications provide tools and capabilities to streamline business processes such as procurement, project management, and finance. These innovative solutions help increase productivity, reduce costs and increase controls.
